An inbred corn line, designated XMS07, the plants and  
seeds of the inbred corn line XMS07, methods for producing  
a corn plant, either inbred or hybrid, produced by crossing  
the inbred corn line XMS07 with itself or with another corn  
plant, and hybrid corn seeds and plants produced by crossing  
the inbred line XMS07 with another corn line or plant and  
to methods for producing a corn plant containing in its  
genetic material one or more transgenes and to the trans-  
genic corn plants produced by that method. This invention  
also relates to inbred corn lines derived from inbred corn line  
XMS07, to methods for producing other inbred corn lines  
derived from inbred corn line XMS07 and to the inbred corn  
lines derived by the use of those methods.
